Introduction

President / Executive Director, Rob Anderson

EnviroCert has prepared this presentation to give our Professionals a summary of our technical progress to date.

My name is Rob Anderson, I am the President and Executive Director. In addition to those duties I have also been serving as Technical Director for ECI. The director duties are largely the oversight and direction of the technical development for all of the certifications.

Associate Executive Director

Technical Manager / Head of Admissions

Organizational Overview

Efforts during the Pandemic + New Resources

Associate Executive Director, Melissa McKinney

Joining us today is Melissa McKinney, Associate Executive Director. Melissa is responsible for ensuring the integration of these endeavors into the organization's operations both nationally and internationally.

Technical Manager / Head of Admissions, Charles Wilson

Finally, Charles Wilson, the Technical Manager/ Head of Admissions. Charles is responsible for daily coordination and implementation of technical content for all existing and proposed Professional Certifications and Certificates of Training.

What ECI Offers
Organizational Overview
• EnviroCert (ECI) is recognized as a national leader in the certification industry for environmental and stormwater certifications.
• Over 40,000 certifications have been awarded over the last (40) years.
• ECI is an international, accredidation compliant, certification body recognized throughout the United States and over forty four (44) countries.

ECI's Professional Certifications + Certificate of Training

EnviroCert offers six (6) distinct and specialized Professional Certifications and one (1) Certificate of Training.

Online + On-Demand

Fortunately, over the past two (2) years, ECI had started recording On-Line and On Demand General Principal Review courses.

These resources have provided many individuals the opportunity to progress through the process of earning a Certification and/or PDH's.

Recording Studio

Remote Proctoring

New CMS

Recording Studio

In an effort to complete those certifications that have not been recorded in the studios, ECI has built a recording studio where we are diligently in the process of completing the remaining General Principal Reviews.

Remote Proctoring

- A new addition to the ECI resources is the option of Remote Proctoring that is being provided by Prometric.
- This option allows you to download software and have a live proctor remotely oversee the exam process from your home or office.
- ECI has spent hundreds of hours on beta testing and review, and we hope this provides the applicants with a favorable exam experience.
- A majority of certification exams are currently available with the remainder nearing release.

New CMS System

Another new resource that is in the final stages is the upgraded Prometric Certification Management System, that will be launching over the next month or so. The new CMS will be a very user-friendly improvement that should streamline your experience with managing your Professional records and renewals.

Let me take a few more minutes to provide you a general overview of our progress with each of the certifications.

QSM
ENVIROCERT
Qualified Stormwater Management (QSM)-
Certificate of Training
Launched on Prometric as a bundle package. This certificate of training has been an overwhelming success. It is intended to be an entry program for persons new to the stormwater field.
QSM was recently converted to Spanish and will be developing a Spanish version of the Prometric bundle package. ECI currently has staff working on converting the QSM to French, German, and Chinese.

CPISM
ENVIROCERT
Professional Certification: CPISM
Certified Professional in Industrial Stormwater Management™
The industrial program was released by ECI in 2017.
ECI staff will be in the studio recording the General Principal Review in Spring of 2021. Final release, after post-production editing and QA/QC, should result in a release by the Summer.

CPMSM
ENVIROCERT
Professional Certification: CPMSM
Certified Professional in Municipal Stormwater Management™
This program has been with the CPMSM Steering Committee
ECI staff will be in the studio recording the General Principal Review in Spring of 2021. Final release, after post-production editing and QA/QC, should result in a release by the Summer.

CPSWI
ENVIROCERT
Professional Certification: CPSWI
Certified Professional in StormWater Inspection™
This new inspector program has been developed by Geosyntec and RJR Engineering (volunteer effort) arising out of the CESSWI update. This program will be an elevated inspector program that focuses on soil, hydrology and drainage and various other skill sets with an emphasis on a wide spectrum of inspections, not just construction.

CESSWI
ENVIROCERT
Professional Certification: CESSWI
Certified Erosion, Sediment and StormWater Inspector™
The before-mentioned efforts for the previous Certifications are all part of the development of the updates for CESSWI.
CESSWI program is being expanded to focus on construction related practices. The program is expected to be expanded to about 8 hours of technical content based on the updated expanded Job Analysis / Scope of Practice efforts and responsibilities.

CPESC
ENVIROCERT
Professional Certification: CPESC
Certified Professional in Erosion & Sediment Control™
The before-mentioned efforts for the previous Certifications are all part of the development of the updates for CPESC.
CPESC program is being expanded based on updated international feedback as well as the expanded Job Analysis / Scope of Practice efforts and responsibilities. The program is expected to be expanded to over 14 hours of technical content.

CPSWQ
ENVIROCERT
Professional Certification: CPSWQ
Certified Professional in StormWater Quality™
This program is being updated and re-scoped by ECI Staff, Technical Committee and RJR Engineering (volunteer effort) based on updated Job Analysis/Scope of Practice efforts. This will be Design Certification.

CPWPC
ENVIROCERT
Professional Certification: CPWPC
Certified Professional in Water Pollution Control™
ECI launched the technical consultants (lead by Jacobs) in the summer, 2020. Program development is underway, and we anticipate launching this Water Pollution Control Professional Certification by End of 2021

Professional Certification: NGICP

National Green Infrastructure Certification Program™

EnviroCert International, Inc. (ECI), recently acquired the National Green Infrastructure Certification Program (NGICP) from the Water Environment Federation (WEF). The NGICP sets national certification standards for green infrastructure (GI). NGICP meets international best practice standards and advances sustainable communities by promoting GI as an environmentally and economically beneficial stormwater management option. The NGICP was approved by the American National Standards Institute (ANSI) in 2019.
